Top news of the month

LRP Changes

Starting July 1st LRP Contracts need to be written, signed and sent to the company by 8:25 am.

We can no longer write a contract and wait for a signature. If the company does not have the signed contract by 8:25 am the contract is not in place.

This is an RMA Rule!!

LRP is still a great way to protect the price on your cattle.

REPLANT ON SPRING CROPS

- Available on all MPCl Policies due to a natural disaster
- Helps cover cost of replant; does not cover all expenses
- Must be opened PRIOR to REPLANTING

Production:

Remember to keep production separate for all OPTIONAL and ENTERPRISE wheat units!! You do not want to jeopardize a potential claim by co-mingling grain.

- Please return wheat production with elevator proof-of-yield sheets (marked where loads came from)
- Wheat harvest price is tracking till the end of June
- Losses should be turned in 15 days after a unit is harvested
- Binned wheat with a loss must be measured by an adjuster

Thank you

WE APPRECIATE THE OPPORTUNITY TO ASSIST YOU WITH YOUR RISK MANAGEMENT NEEDS. WE THANK YOU FOR YOUR BUSINESS. IF YOU EVER HAVE ANY QUESTIONS, CALL US AT 785-479-5593 OR 888-408-7487

SPRING CROP ACREAGE REPORTS

Acreage reports have been mailed to producers and tenants. If you have a landlord that is also insured with us, we will need your Spring Crop Acreage Reports returned by July 1st, or as soon as possible. We are getting some back already...Thank You! However, do not send them back before you have finished planting fields. Plant dates must be reported after the field is planted, not anticipated plant dates.

Acreage revision rules have again changed. Partial field revisions have become more challenging, in some cases requiring you to get an independent measuring service now—at your own expense. Please double check your acreage that has been planted, especially when planting partial fields. Please mark your acreage reports (each open field marked what crop is planted) with all information that we need to know. Write in the acreage of each crop in the grid on the next page. It is another way to double check what you have marked above. PLEASE DO NOT ASSUME WE KNOW WHAT YOU HAVE PLANTED, OR THAT WE KNOW YOUR CROP ROTATION. We have to take it as it is written, if it is incomplete, we will call you. All information must be specified on the current acreage report for the current season.

These reports are (since 2011) sent/scanned to the company for document storage.

*If you split fields to plant different crops, you need to mark the terrace or line where you believe it is at. You will need to write in what you believe the acreage is.

*Fields Not Listed: Be sure to let us know if a field is not included in your maps!

Also, please write a zero on the grid for any unit that you are not planting to that particular crop, or we will have to call to verify “blanks” /open fields left on your acreage report.

Wheat Appraisals

* If you are needing to do anything to your wheat besides harvest it for grain, make sure you get an appraisal. If you destroy your wheat without an appraisal it is considered destroyed without consent! *

Announcement

It has been 24 years ago that Kevin and I became licensed crop insurance agents! And I have enjoyed almost every day of it. Yes, almost. I did not enjoy the floods and droughts that robbed you of your crops, or when prices were low and input prices were high, or when life just wasn't going well for you. I have always enjoyed seeing and visiting with customers, friends, and neighbors; helping to solve problems and checking on issues that need to be taken care of; working through sometimes-difficult times of making changes as loved ones passed, or changes in family situations; or just listening if times were hard.

It is with all of the good memories that I have with so many of you, and knowing that the others in the office will take care of your questions and needs so well, that I am announcing that I have retired from the day-to-day office routine. I will continue with the bookkeeping, accounting and being licensed. I plan to enjoy more time with grandkids, gardening and sewing/quilting. I know I will see many of you around at community events and will get the opportunity to catch-up. So it is not good-bye, it is see you later!

~ Rose

Please join us for a retirement recognition

July 11th, 2023

8:30 - 10:30 am

Harris Crop Insurance

1207 Hwy 15 Abilene, KS
